Subject: RE: Blades postcard handout option

Thanks for putting this together. I think it will be a good idea so the participants can physically leave with something and emphasize once the participants walk in the door that their water is safe to drink. I imagine most of the people coming are most concerned with their water safety.

Ex. 5 Deliberative Process (DP)

We can talk about it in a couple hours.

Subject: Blades postcard handout option

Hi all,

I put together a one sided post card that we could use for a handout at the meeting on Thursday. It contains similar information to the one we mailed out (information to comment, EPA contact information, etc). The main change and takeaway is that it clarifies that the public drinking water is being treated and meets water quality standards.

Let me know your thoughts. We can discuss this briefly tomorrow morning and decide if we want to provide something like this.

Thanks,

Amanda Miles
